

Microsoft 365 Copilot Business – Feature Overview

Microsoft 365 Copilot Business is an AI-powered assistant integrated into Microsoft 365 applications. It enhances productivity by helping employees analyze information, summarize content, generate documents, and extract insights from emails, meetings, and files stored within the organization.

Core Capabilities

- AI-powered Copilot Chat that understands organizational context using Microsoft Graph data.
- Integration across Microsoft 365 applications including Teams, Outlook, Word, Excel, and PowerPoint.
- Ability to analyze work data such as emails, meeting notes, files, and calendars to generate insights.
- Support for intelligent prompts that help users quickly find information or generate content.

Microsoft Teams AI Meeting Intelligence

- Automatic meeting transcription and AI-generated meeting summaries.
- Extraction of action items, decisions, and discussion highlights.
- Ability to ask questions during or after meetings such as 'What decisions were made?' or 'What tasks were assigned to me?'.
- Quick recap of missed meetings and intelligent meeting notes.

Outlook AI Email Assistance

- Summarize long email threads and highlight important points.
- Identify action items from selected emails.
- Draft replies and email responses based on conversation context.
- Prompt-based analysis such as requesting action items from selected emails or summarizing inbox activity.

Word, Excel, and PowerPoint AI Support

- Generate documents, reports, or summaries in Word from simple prompts.
- Analyze datasets and generate formulas, insights, and visualizations in Excel.
- Create presentations in PowerPoint from documents or prompts.
- Automatically summarize documents and extract key information.

Copilot Studio and Automation

- Create and deploy custom AI agents using Copilot Studio.
- Automate workflows and repetitive tasks using AI-driven processes.
- Extend Copilot functionality across organizational tools and services.

Business Benefits

- Improves employee productivity by reducing manual tasks.
- Enhances collaboration through intelligent meeting summaries and chat insights.
- Accelerates decision-making by analyzing large volumes of business information quickly.
- Provides contextual assistance directly within the Microsoft 365 applications employees already use.

Microsoft 365 Copilot Business

Supercharge employee productivity, streamline processes, and add measurable value across your organization with an AI assistant.
